

**NOTES:**

All resistors 2W, carbon film (e.g., KOA SPR2 or Kiwame) unless specified  
 "CC" means Carbon Comp resistor  
 R3 - R8 values depend on desired bias voltage adjustment range  
 For resistive tail instead of CCS, omit U1 & R15, jumper U1 pins 2 & 3, R16 is the tail resistor  
 For cathode bias, omit R3 - R8, C1, & C2, jumper wire across C1 and C2  
 C6 & C9 values dependent on output tubes & transformer

# Compactor Triple Triode Driver
